Southern California HEAL Network Leaders Learning Circle  
February 12, 2013  
Agenda

Place-based networks that focus on environmental and policy change are very different from the service-oriented coalitions of times past! What does it mean to create “collective impact” and “lead with a network mindset”? What are the skills required for a “project coordinator” to transition to a true “network leader”? What role does data play in supporting this role as well as creating and sustaining transformational change?

Objectives:
- Participants will understand the concept of “collective impact” and its relationships to key network leadership skills
- Participants will gain practice using key network leadership skills
- Participants will understand and be able to use relevant Evaluation Team tools
- Participants will identify opportunities for using the HEAL website to advance their efforts

Reading:

9:00 – 10:00 am:  Registration, Continental Breakfast and Optional Walk

10:00 – 10:10 am:  Welcome and Introduction  

   Judy Harper and Ama Atiedu
