HEAL Fall 2014 Learning Community
Tuesday, November 4, 2014 | The Westin Pasadena
School Strategies: Working Together to Fill in the Gap

Learning Objectives:
• Participant will have a better understanding of the data available to schools and their partners
• Participants will practice using school data to identify healthy eating and active living needs
• Participants will practice using a process and tool for engaging partners in identifying non-traditional solutions for addressing healthy eating and active living for schools

Instructions: Assign a facilitator/time keeper and note taker for your group. Take 10 minutes to review the data sheet. Then go through the questions below. You will have 10 minutes for each question.

Question 1: What’s alarming?
From the data presented, identify some data points that may indicate gaps/challenges that schools face related to healthy eating and active living.

Question 2: What can we do?
From the list of gaps or challenges, what are some potential solutions? Take into consideration the limitations that schools face. Think of solutions that may expand beyond the school walls.

Question 3: Who else do we need?
What are some non-traditional partners that could support the solutions that you have identified?
