HEAL Summer Learning Community 2017: Data at Your Fingertips
Online Data Resources

The following is a list of online data resources. You can use them to find a variety of information about your local community, as well as data about your city, county, and state. Visit HealZones.org for more online data resources.

Health Behaviors

AskCHIS Neighborhood Edition
Provides health estimates for California's diverse population at the local level (zip codes and cities). You can get estimates on top health indicators for your zip code, city, county and legislative district.
http://askchisne.ucla.edu

Healthy City
An easy-to-use online platform for accessing data, creating maps, and working collaboratively. It allows users to theme and filter data, conduct research, and connect with their communities. You can look up your zip code to find information about your community.
http://www.healthycity.org/places/?fid=81282

Kids Count Data Center
A project of the Annie E. Casey Foundation to track the well-being of children in the United States. Users can look up information at the state, county, city, congressional district, or zip code on topics including economic well-being, education, health, and more.
http://datacenter.kidscount.org/data#CA/3/0/char/0

Kids Data
Allows users to easily find, customize, and use data on more than 500 measures of child health and well-being. Data are available for every county, city, school district, and legislative district in California.
http://www.kidsdata.org/

Youth Risk Behavior Surveillance System (YRBSS)
Monitors six types of health-risk behaviors at the state, county, and city level that contribute to the leading causes of death and disability among youth and adults including behaviors that contribute to unintentional injuries and violence, sexual behaviors, use of alcohol and other drug, unhealthy dietary behaviors, and inadequate physical activity

Socio and Economic Factors

Census Business Builder: Regional Analyst Edition - 2.2
Built for chambers of commerce, regional planning staff, and others who need a broad portrait of the people and businesses in their service area. It presents data for many sectors of the economy at the county and/or city level.
https://cbb.census.gov/rae/
Community Facts
Provides popular facts and frequently requested data about your state, county, city, town, or zip code.
https://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml#

Data USA
Allows users to understand and visualize critical issues facing the United States, your county, city, or community in areas like jobs, skills, and education across industry and geography.
https://datausa.io/

DataQuest
Provides facts about California schools and districts.
http://data1.cde.ca.gov/dataquest/
http://data1.cde.ca.gov/dataquest/content.asp

Ed Data
Collects, analyzes, and publishes fiscal, demographic, and student performance data from schools, districts, and county offices of education.
http://www.ed-data.org/

Quick Facts
Provides statistics on cities and towns with a population of 5,000 or more.
https://www.census.gov/quickfacts/fact/table/US/PST045216

Access to Multiple Data Sources

California Department of Public Health
Summary of key obesity prevention data sources for California. Included are the names of the datasets, years available, populations surveyed, whether BMI is included, which target area(s) identified in the California Obesity Prevention Plan are covered, the level of specificity, and a hyperlink to the dataset.
https://data.chhs.ca.gov/

Community Commons
Provides public access to thousands of meaningful data layers that allow mapping and reporting capabilities so users can thoroughly explore community health. Users can look up poverty rates, student data, climate, disability, health outcomes, language use, and more. This information is available at the state, county, city, or local community level (depending on the data set). Users will need to create a free account.
https://www.communitycommons.org/maps-data/
https://maps.communitycommons.org/viewer/datalist.aspx

Data.Gov
Search for open-sourced data, tools, and resources to conduct research, develop web and mobile applications, design data visualizations, and more.
